INDOOR AIR QUALITY PRODUCTS

Complete your comfort
with cleaner, fresher indoor air

Indoor Air Quality Products

Carrier indoor air quality products take your comfort to heart with solutions that help clear the air of impurities, manage humidity levels, provide whole-home ventilation and more. It's next-level comfort you can really enjoy, well beyond the basics of simple temperature control. Offering a full complement of options, designed to work with your new or existing home comfort system, Carrier indoor air quality products are a smart and versatile solution for achieving a more comfortable indoor environment.

THERE'S SOMETHING IN THE AIR

When you look around your home, you probably don't see anything unusual. But according to the EPA, you may be surrounded by higher counts of many airborne pollutants than you would be exposed to outside.* These pollutants can affect your comfort and your well-being.

Make the Invisible Visible: Common Indoor Air Issues		
Issue/Source	**Symptom***	**Our Solution**
Particle Allergens Pets, dust mites, mold, pollen, animal dander	Known to trigger and worsen asthma and allergy symptoms	**Air Purifier**
Chemical Pollutants Cleaners, paints, adhesives, pesticides, cosmetics and air fresheners	Nausea and headaches. At high levels, can cause eye irritation	**Ventilator**
Carbon Dioxide Simple breathing. Burning candles, gas, wood and other combustibles	Drowsiness, poor concentration	**Ventilator**
Relative Humidity Too much or not enough moisture in the air	**Moist air –** mold and dust mites **Dry air –** nosebleeds, dry eyes and skin	**Dehumidifier, Humidifier**
Mold and Bacteria on the Cooling Coil Dampness	Coughing, respiratory issues	**UV Lamp**

GIVE US 30 MINUTES, WE'LL GIVE YOU A SOLUTION.

Your local Carrier dealer is equipped with knowledge, expertise, and an indoor air analyzer that provides a detailed air analysis in about 30 minutes. Armed with the results, your dealer can address specific air quality issues with products from our comprehensive line of air purifiers and filter cabinets, ventilators, humidifiers, dehumidifiers and UV lamps.

Infinity Air Purifier

OUR BEST DEFENSE

Indoor air circulates through a home's return air ducts, into the heating/cooling system, then back into the home's living areas. It is full of tiny airborne pollutants such as pollen, dust, and pet dander. The largest of these particles settle on interior surfaces and appear as dust. Smaller particles also settle, but become airborne again with the slightest disturbance. Our best defense – the Infinity air purifier operates silently in-line with your HVAC system, minimizing airborne pollutants in your home trapping 95% of particles (1.0-3.0 microns)[1], creating fresher indoor air.

VALIDATED

ZERO OZONE EMISSIONS – MEASURED OZONE EMISSIONS FROM INFINITY® AIR PURIFIER DURING USE PHASE DOES NOT EXCEED 0.005 PPM AS TESTED ACCORDING TO CSA C22.2 NO. 187-20. UL.COM/ECV

Air Quality

Model EZXCAB

CARRIER EZ FLEX™ CABINET AND FILTER

Today's homes are more energy efficient than ever – sealed tighter and better insulated to keep heated or cooled air on the inside. The unfortunate side effect is that these same homes also do a better job retaining dust, dirt, pollen and more, trapping them inside to circulate and recirculate throughout your living spaces. These particles settle on furnishings, pollute the indoor air and rob your comfort system of efficiency by restricting airflow and making it work a little harder. The Carrier EZ Flex cabinet and filter can help alleviate those issues, with the MERV 13 model effectively clearing the air of more than 90% of airborne particles as small as 1.0 micron in size.* The MERV 10 model removes 63% of airborne particles as small as 1.0 micron in size.**

* Based on third-party testing (2013) showing 90% of particles size 1.0 to 3.0 captured and 98% of particles size 3.0 to 10 captured.
** Based on third-party testing (2015) showing 63% of particles size 1.0 to 3.0 captured and 91% of particles size 3.0 to 10 captured.

ULTRAVIOLET (UV) LAMPS

Your heating and cooling system is the unsung hero of your home, constantly running in the background to keep you cozy and comfortable. As air passes through the cooling coil, mold spores, bacteria and fungi stick to its damp surfaces. Buildup of these contaminants can reduce system performance and lead to the release of harmful mold spores and unpleasant odors into your home.

To help alleviate these issues, the Carrier UV lamp is mounted near the cooling coil where fungus and microbes can grow. The intense UV light is designed to reduce bacteria and mold growing on and around the indoor coil, enhancing system efficiency and improving the quality of your indoor air.

Model UVLCC(1, 2)LP

Model UVCAP

CARBON AIR PURIFIER WITH UV

The Carbon Air Purifier with UV helps maintain a healthier home through air purification targeting the reduction of unwanted odors, volatile organic compounds, and common household gases from indoor air. It aids in the reduction of microoganism growth, such as mold, fungi, bacteria and viruses, on the evaporative coil,[2] and release into recirculated indoor air.[3] The dual technology in Carrier's Carbon Air Purifier with UV provides continuous treatment while your HVAC system is running so you can enjoy a healthier home.

Fresh Air Ventilation

CARRIER WHOLE-HOME VENTILATORS

Carrier fresh air ventilation offers a controlled solution for bringing fresh outdoor air into your home. It's efficient because it ventilates without the energy loss you would experience through an open window or screen door. Whole-home ventilation is more important than ever with today's more tightly sealed, energy-efficient homes that tend to trap airborne pollutants to circulate throughout your home.

COMFORT AND EFFICIENCY

Our energy and heat recovery ventilators can maintain your comfort with minimal heat loss. Here's how:

- Fresh, outdoor air and stale, indoor air enter our high-efficiency heat recovery core
- Up to 70% of heat (or energy) from the indoor air is transferred to the clean, outdoor air for circulation throughout your home using a heat or energy recovery core
- Energy recovery ventilators (ERVs) also remove excess humidity to enhance comfort and save energy
- The outgoing and incoming air never mix, so you have a continuous flow of fresh air

Which One is Right for Me?

ERV: An ERV, or energy recovery ventilator, is the right choice in the Midwest and southern states, where removing humidity from incoming air is vital to efficient, comfortable performance.

HRV: An HRV, or heat recovery ventilator, is a great choice for comfort and efficiency in colder climates with longer heating seasons, such as Canada or the northern United States.

ERV/HRV
ERVXXSHA HRVXXSHA

ERV/HRV
ERVXXSVA HRVXXSVB
HRVXXSVA

ERV/HRV
ERVXXLHB HRVXXLHB

Fresh Air Vent: Our most affordable and compact whole-home ventilation solution, the Carrier fresh air vent provides a controlled solution for fresh, indoor air without the heat exchange or humidity transfer of an ERV or HRV.

Model FAVCR

Add-On ERV: For installations with space limitations, the add-on ERV offers a more compact solution that fits while still providing the needed ventilation and efficient performance.

Model ERVCRNVA

Humidity Management

HUMIDIFIERS

A Carrier humidifier can "moisturize" dry, heated, winter air, making your home feel more comfortable. That's important because during the heating season, your home can feel drier than the desert. Properly humidified air can help relieve the discomfort of dry nasal passages, itchy skin and static shocks.

A comfortably humidified home can help save energy, too. Because you are less likely to turn up the heat, you could potentially save money on your heating costs. With five distinctly different models, there's a Carrier humidifier that is just right for your home.

Model	STM	LBP	SBP	WBP	LFP
Unit Type	Steam	Large bypass	Small bypass	Water saver bypass	Large fan-powered
Capacity (gallons/day)	34*	17	12	17	18
Water Vapor Delivery	Dispersion tube in duct	Expanded aluminum evaporator pad	Expanded aluminum evaporator pad	Wicking paper evaporator pad	Expanded aluminum evaporator pad
Notes	Large homes, highest output	Large homes	Small homes	Efficient in water usage	Large homes

* Varies, based on voltage and amperage.

CARRIER WHOLE-HOME DEHUMIDIFIERS

As summer temperatures and humidity rise, your air conditioner or heat pump dehumidifies your home during the cooling process. To achieve desired humidity levels, the system often operates with greater frequency. By adding a Carrier whole-home dehumidifier, your system can more effectively pull excess moisture from the air circulating throughout your home. You'll feel more comfortable without over cooling, meaning you can turn the thermostat up a few degrees to help save on energy costs.

Keeping humidity under wraps can also improve the quality of the air you breathe by helping to keep musty odors and some allergens under control.* It can help prevent warping or structural damage to wood flooring or furnishings. And, setting your dehumidification levels is simple and convenient using the LCD control that can remain on the dehumidifier cabinet or installed at a more easily accessed location.

Model DEHXX

A built-in "clean filter" indicator tells you when it's time to change the filter.

Choose Carrier and You're Covered

When you trust your comfort to Carrier, you're making the smart choice. It starts with professional product recommendations and installation from your local Carrier dealer. Then you can relax, knowing our products are built to endure, and are backed by robust warranty coverage.

LIMITED WARRANTY

To the original owner, the Infinity air purifier, UV lamp base, carbon air purifier with UV, humidifiers, heat recovery ventilators and energy recovery ventilators are covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not registered within 90 days of installation except in jurisdictions where warranty benefits cannot be conditioned upon registration.

To the original owner, the Carrier fresh air vent and dehumidifier are covered by a five-year limited warranty. The Carrier UV lamp bulbs are covered by a 90-day parts limited warranty.

See warranty certificate at *carrier.com* or included in product literature for complete details and restrictions.

[1] MERV is a filter efficiency standard ranging from 1 to 16 (higher MERV = higher efficiency). The Infinity air purifier achieves a MERV 15 rating based on third-party testing (2012) showing 95% of particles size 1.0 to 3.0 microns captured and 85% of particles size 0.3 to 1.0 microns captured.

[2] The efficacy of the Carbon Air Purifier with UV (UVCAPXXC2015) to rremove Aspergillus niger (97%), Penicillium citrinum (>99.99%), Escherichia coli (>99%), Staphylococcus epidermidis (>99.9%), Coronavirus 229E (95%) and MS-2 bacteriophage (>99.99%) from treated surfaces after 24 hours was demonstrated in an ASTM E3135-18 test conducted by a third-party laboratory under ambient temperature and humidity conditions.

[3] The efficacy of the Carbon Air Purifier with UV (UVCAPXXC2015) to remove a surrogate airborne pathogen, MS-2 bacteriophage, was demonstrated with a decay rate (k) of 0.162860 and Clean Air Deliver Rate (CADR) of 130.6 cfm in 60 minutes in a chamber test conducted by a third-party laboratory using a 1007 ft3 chamber with an airflow of 1,220 cfm, test temperature of 74-77°F and relative humidity of 45.1-46.6%.
